

# Retail Display Ban Solutions

Hand Built has developed a retailer friendly Retail Display Ban (RDB) merchandising solution.

The self closing easy to use gravity angled timber door acts as the most successful and proven market leader in the display ban solutions. Each dispenser comes equipped with the self closing sliding doors as part of the dispenser kit.

Doors are made to suit 2 bay or 3 bay dispensers and have the option of Price Boards or other advertising displayed to the front of the doors.

If the RDB self closing doors are not desired then we offer a range of plastic internal solutions. (See Internal Solution Tab)

Plastic extrusion covers provide full coverage of tobacco products.
